

**Silberline to increase prices on full line of
Aluminum Effect pigments effective
August 1, 2018**

Over the years Silberline has attempted to maintain price stability for our customers despite inflationary pressures from higher costs for regulatory conformance, sustainability initiatives, escalating labor costs and raw material price volatility. We have endeavored to offset these upward costs pressures by focusing our efforts on operational excellence.

Unfortunately, Silberline can no longer continue to absorb these costs and must implement a price increase of 5 – 8%, depending on the specific product, effective August 1, 2018. Your Executive Account Manager will be contacting you soon to provide specific details.

We at Silberline remain committed to bringing our customers the highest quality products and service possible. To do so we must take this necessary action to ensure the integrity of our business.
