

## SILBERLINE SHOWCASES FINER, BRIGHTER ALUMINUM PIGMENTS

### How much brighter does it get?

When it comes to highly reflective coatings, the brighter the better. Market studies show end-use customers seek fashionable products with enhanced brilliance globally.

At the forefront, SILBERLINE® steps up by introducing their SPARKLE SILVER® Elite and SPARKLE SILVER® Elite Liquid Metal families for just this effect.

SPARKLE SILVER Elite 010 offered at 10 microns ( $\mu\text{m}$ ) & SPARKLE SILVER Elite 012 at 12 microns ( $\mu\text{m}$ )

- Both with enhanced silver dollar geometry. Creating brilliance and high gloss masstone silver colors as well as clean and vibrant tints that can be used in Automotive OEM, refinish or any industrial coating requiring high gloss and brilliant metallic sheen or "real metal" appearance.

SPARKLE SILVER Elite Liquid Metal 011 offered at both 11 microns ( $\mu\text{m}$ ) & 15 microns ( $\mu\text{m}$ )

- With fine silver dollar geometry and a highly polished surface. These products can be used in a multitude of coatings ranging from Automotive OEM, refinish, interior auto, wheel coatings, 3C as well as General Industrial applications.
