# SparkleBrite™ Ultra

## Product Guide

[www.silberline.com](http://www.silberline.com)

## SparkleBrite™ Ultra

As innovative as always Silberline are pleased to offer the new standard for brilliance in milled aluminium pigments.

New milling technologies and techniques have allowed our development experts and formulators to produce a dazzling array of pigments that are brighter than ever before whilst offering excellent opacity. This allows inks to provide wonderful eye-catching effects with cost effective prices and problem-free printing. The SparkleBrite Ultra grades extend the ever popular SparkleBrite range of pigments and these brilliant effects are partnered by unparalleled opacity.

These new non-leafing grades offer an exciting development for labels and packaging, particularly on film where ultra bright metallic effects can be achieved on second side applications. They are also widely compatible with a wide range of resins used in flexo and gravure liquid inks.

Feature	Benefit
New advanced silver dollar technology	Ultra bright aesthetic effects
Outstanding opacity	Brilliant effects achieved in one-hit, even with low pigment loading
Narrow particle size distribution	Increased print stability even at high speeds

Together we brighten our world!

\* IPAC = isopropyl acetate
