

SPARKLE SILVET[®] FDA FDA Compliant aluminum pigments for the plastics market

No matter where you are,
we've got you covered.

Silberline is proud to introduce FDA E1 pellet technology for the plastics market. With Sparkle Silvet FDA E1 pellets, customers can be confident their formulation would adhere to FDA requirements for parts and films requiring indirect food contact compliance.

Silvet FDA E1 technology brings equal or longer shelf life vs standard Silvet E1 pellets. The new E1 FDA technology offers comparable sparkle, gloss and reflectance while offering improved metallic effect over the standard E1 grades while remaining solvent free, easy to handle, low dusting and low odor.

The commercial products offered provide a wide selection of particle sizes and morphology.

Please contact your Silberline representative for samples, documentation and for additional options.

INITIAL COMMERCIAL PRODUCTS

Commercial Tradename	d(50) μm	Flake Geometry	Carrier	% Carrier
SPARKLE SILVET 960-30-FDA	14	Corn Flake	PE Wax	30
